Summary

B.Tech Computer Science student (graduating December 2027) building full-stack JavaScript applications with React.js, Node.js, Express.js, and MongoDB, with 160+ DSA problems solved in C++. Seeking a Software Developer, Backend, or Full Stack internship.

Education

Jamia Hamdard — Oct 2023 – Dec 2027 (Expected)
Bachelor of Technology, Computer Science ***(CGPA: 8.0/10)*** — *Delhi, India*

KIIT World School (CBSE) — 2021 – 2023
Senior Secondary (12th Grade) – 80.7% — *Delhi, India*

Technical Skills

Languages: C++, JavaScript (ES6+), HTML5, CSS3
Backend: Node.js, Express.js, REST APIs, Socket.IO (WebSockets), Authentication
Frontend: React.js, Tailwind CSS, Chart.js
Database: MongoDB, SQL
Tools & Deployment: Git, GitHub, Postman, npm, Render, Vercel, Netlify
CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Computer Networks, Basic System Design

Projects

AI Resume Analyzer | *React.js, Node.js, Express.js, MongoDB, OpenAI API* — Live
- Built a full-stack web app that evaluates a resume against a specific job description using the OpenAI API and returns personalized feedback.
- Implemented ATS score analysis that identifies missing keywords, relevant skills, strengths, and areas for improvement.
- Developed secure user authentication with registration, login, password reset, logout, and protected routes.
- Built RESTful APIs with Node.js, Express.js, and MongoDB to manage user and resume data; deployed on Render.

Real-Time Chat Application | *React.js, Tailwind CSS, Node.js, Express.js, Socket.IO, MongoDB* — Live
- Developed a real-time chat application supporting instant messaging in chat rooms and private conversations using Socket.IO.
- Implemented online user tracking, room creation and joining, and live message updates over WebSocket-based communication.
- Integrated MongoDB to persist chat messages and retrieve conversation history when users join rooms.
- Built a responsive chat interface with online user lists, direct messaging, and unread message notifications.

Expense Tracker System | *React.js, Chart.js, Tailwind CSS* — Live
- Built an expense tracking application with graphical visualization of spending patterns using interactive Chart.js charts.
- Designed a responsive dashboard that lets users categorize, filter, and analyze expenses.
- Implemented a dark mode toggle with a persistent theme preference across sessions.

Professional Experience

Frontend Development Intern — May 2026 – Aug 2026
Uptoskills — *Remote*
- Refactored components across 5+ web pages using React.js and Tailwind CSS to improve responsiveness and accessibility, reducing layout inconsistencies by 30%.
- Integrated REST APIs with a cross-functional team and optimized data fetching, cutting page load time by 20%.
- Built reusable UI components and design system elements, reducing code duplication by 25% and speeding up future feature development.

Achievements

LeetCode: Solved 160+ DSA problems in C++ covering arrays, strings, linked lists, stacks, queues, and trees (profile).

Certificates and Courses

C++ Programming Certification – Delhi Coding Academy, New Delhi (2025)
Introduction to Prompt Engineering with GitHub Copilot – Microsoft Learn
